

I feel the decision to carry an anti-Kerry program just days before the election, and FORCE affiliate stations to pre-empt their regularly scheduled programming to participate is an outrageously blatant attempt to influence the Presidential election. This country cannot stay great if we cannot even hold a fair and reasonable election. It is embarrassing that many now feel we must enlist international 'election watchers' to monitor this election for fear of fraud and corruption. Behavior such as the Sinclair Broadcasting Network rightly add to this fear. Please censure this network for violating their trust of American airwaves.
